

Dear customers,

It seems that these days we hear more about 'Eco-Friendliness' than ever. Both worldwide and at the local level our industry has recognized that it is not a passing trend. It is also a social responsibility as laws are implemented to conduct business in the decorated apparel industry. We stand ready to educate and deliver 'green' products and eco-friendly solutions to our customers. Included in this flyer we have outlined several products from our line that will minimized their impact on the environment.

- D-GRADE INK WASH has low V.O.C.'s, low vapor pressure, low odor. Completely biodegradable and water soluble.
- Specially formulated to remove plastisol inks from both water resistant and pure photopolymer type stencils without softening or damaging the stencil.

Our waterbase line of inks by Matsui offers you an alternative

Citrus Screen Opener,
